

CEL: Comprehensive Counterfactual Explanations Library and Benchmark

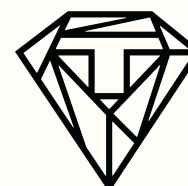

One protocol. Multiple CE paradigms. Measurable trade-offs.

What is a counterfactual explanation?

A small input change that flips a model's prediction.

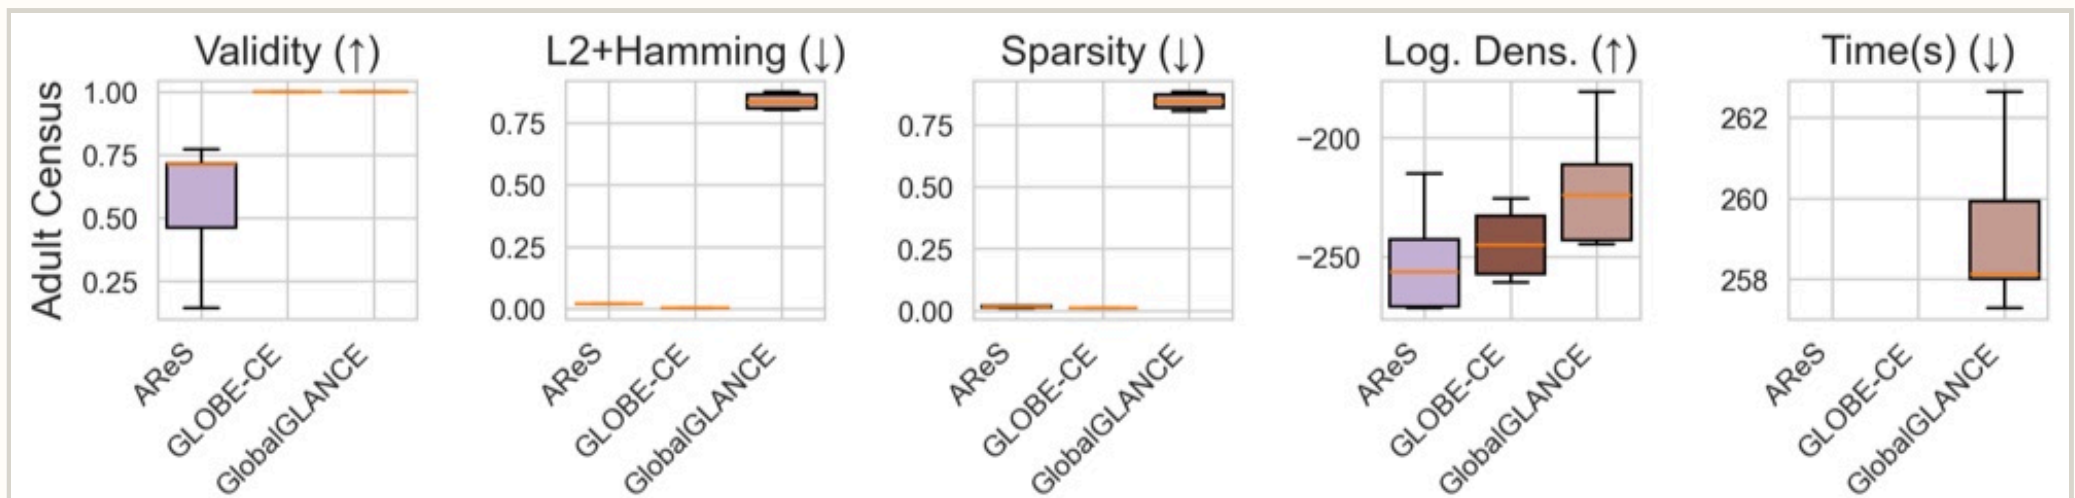

LOAN APPLICATION EXAMPLE

Feature	Original	Counterfactual
Age	35 years	35 years
Employment	Full-time	Full-time
Credit history	6 years	6 years
Loan amount	€15,000	€15,000
Monthly income	€3,000	€3,500
Monthly debt	€1,200	€700
Prediction	Declined	Approved

Only 2 of 6 features change.

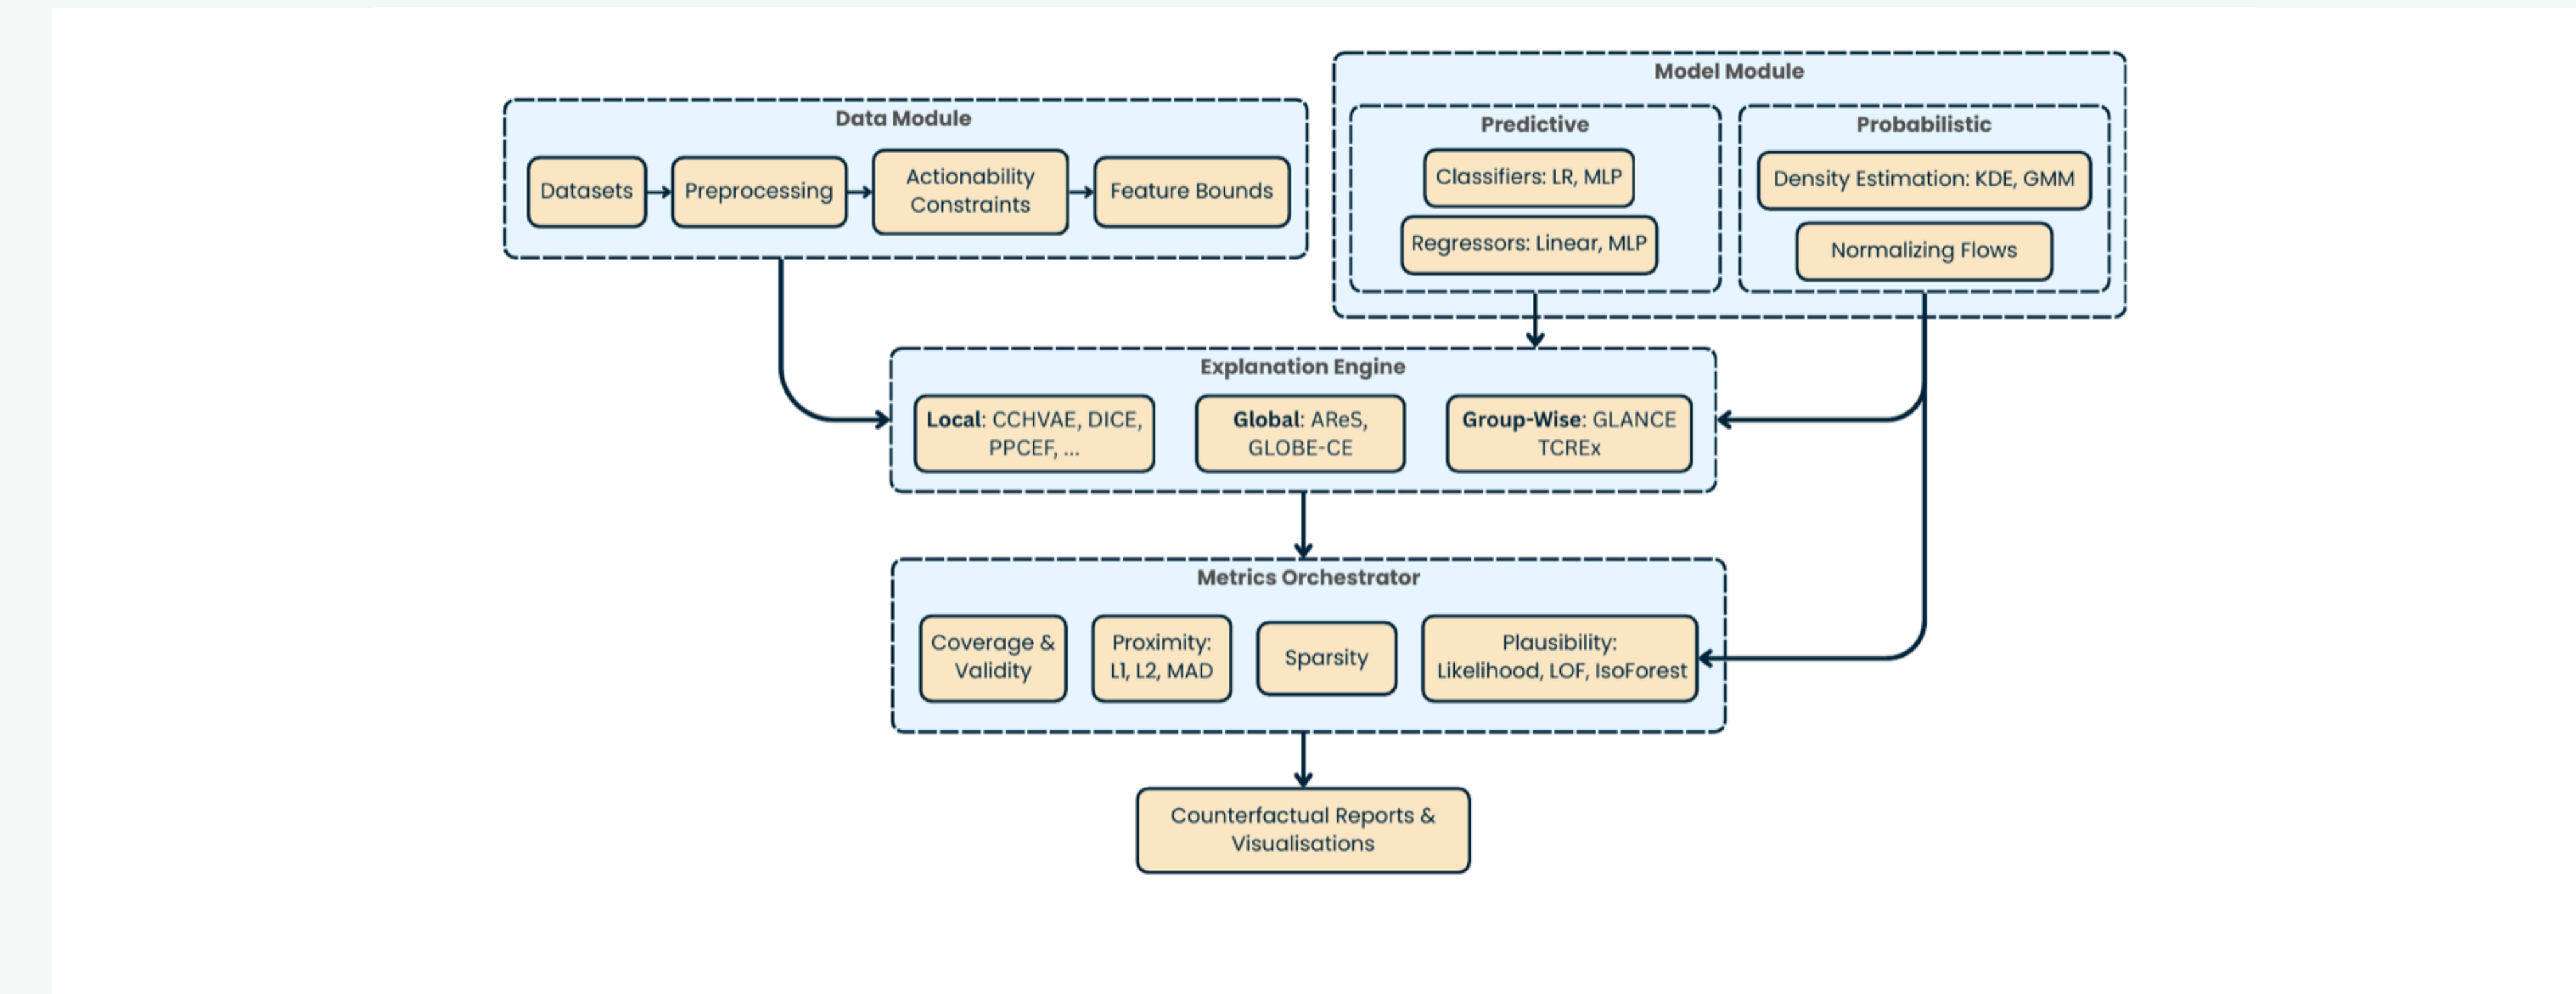

Global: validity and failures

GLOBE-CE and GlobalGLANCE: stronger validity. ARes: frequent missing outputs.

ADULT CENSUS · GLOBAL METHODS

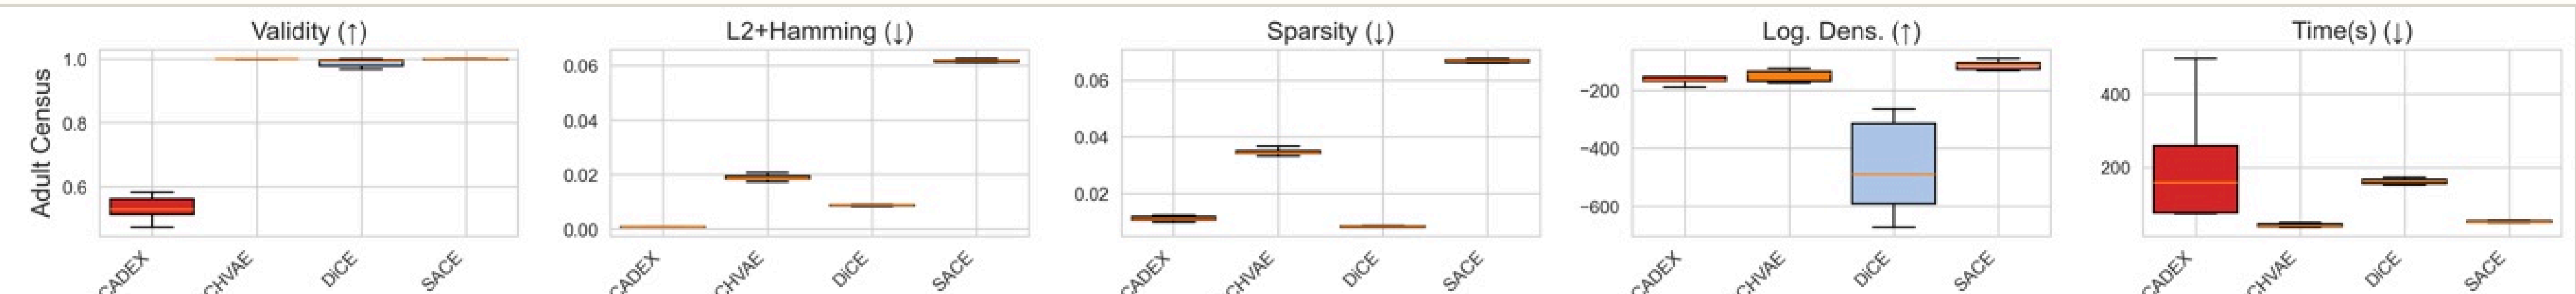

One evaluation framework

SHARED EVALUATION PROTOCOL

Local: no single winner

Validity, proximity, plausibility, and runtime trade off.

ADULT CENSUS · LOCAL METHODS

Three contributions

CONTROL

Controlled evaluation protocol

COVER

Broad benchmark across CE paradigms

EXTEND

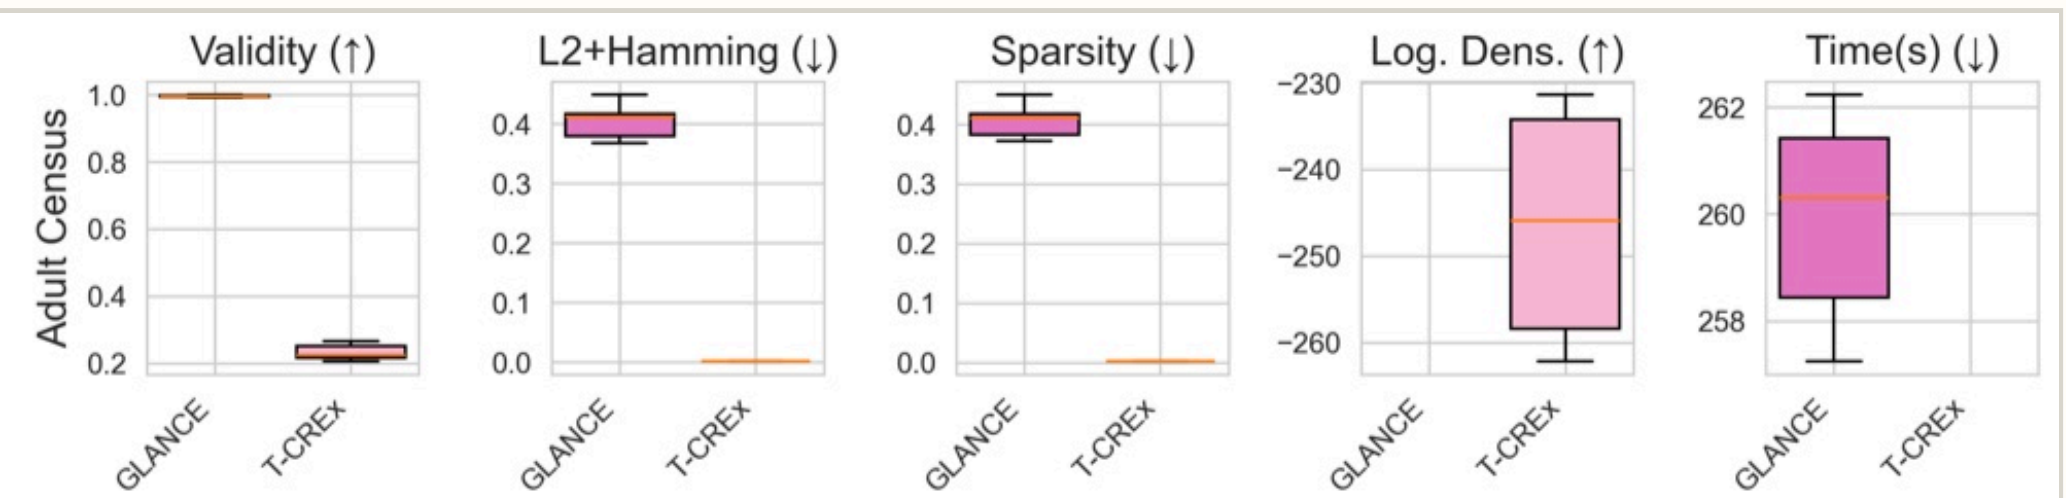

Extensible open-source benchmark workbench

Code & project

Group-wise: reach versus change

GLANCE reaches more; T-CREx makes smaller, more plausible shifts when applicable.
