What is a counterfactual explanation?

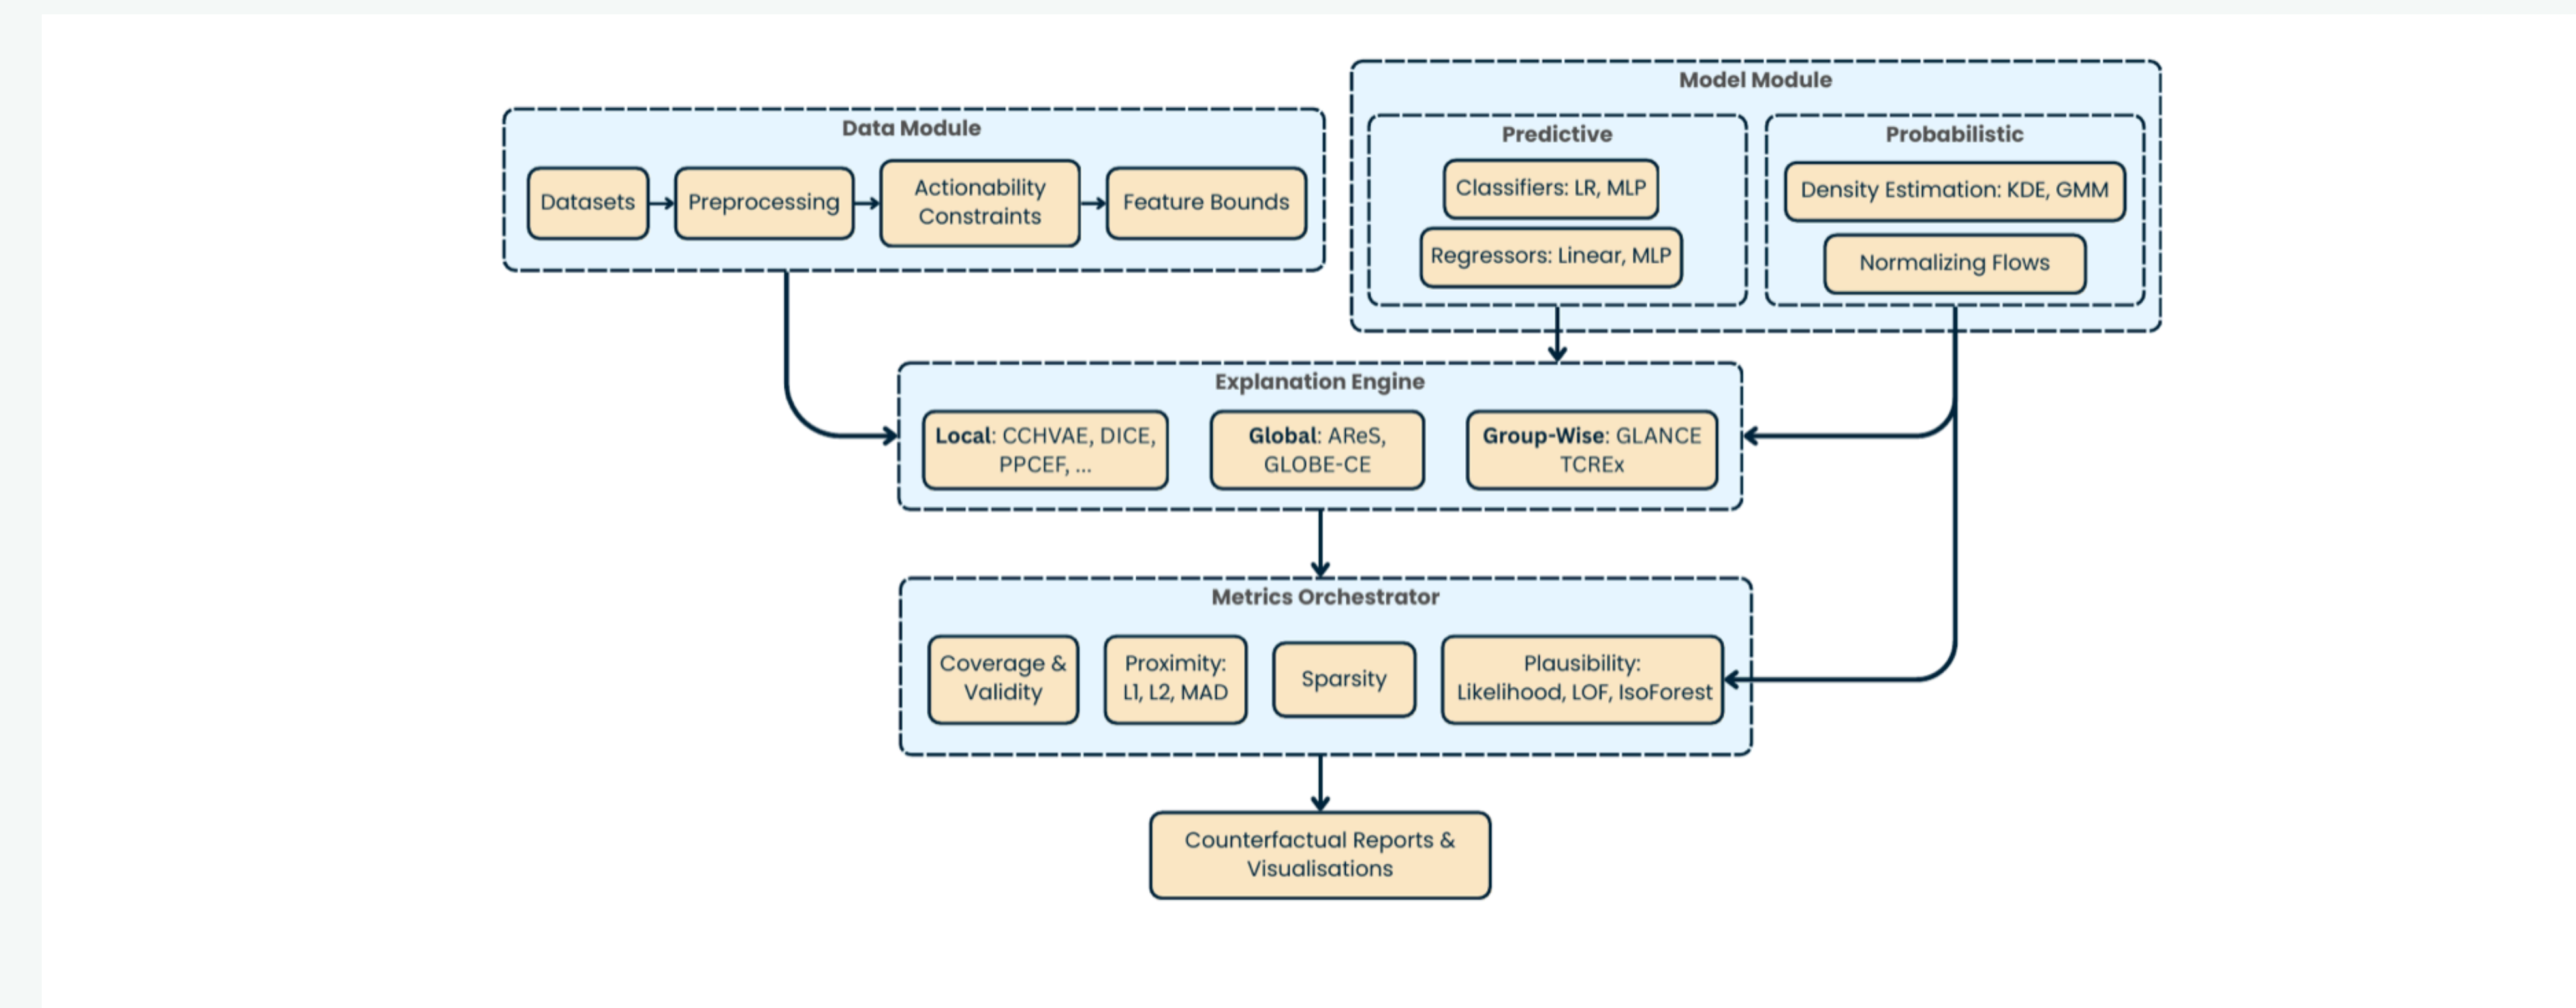

A small input change that flips a model's prediction.

LOAN APPLICATION EXAMPLE

Feature	Original	Counterfactual
Age	35 years	35 years
Employment	Full-time	Full-time
Credit history	6 years	6 years
Loan amount	€15,000	€15,000
Monthly income	€3,000	€3,500
Monthly debt	€1,200	€700

Prediction **Declined** **Approved**Only **2 of 6** features change.

COVER

Broad benchmark across CE paradigms

EXTEND

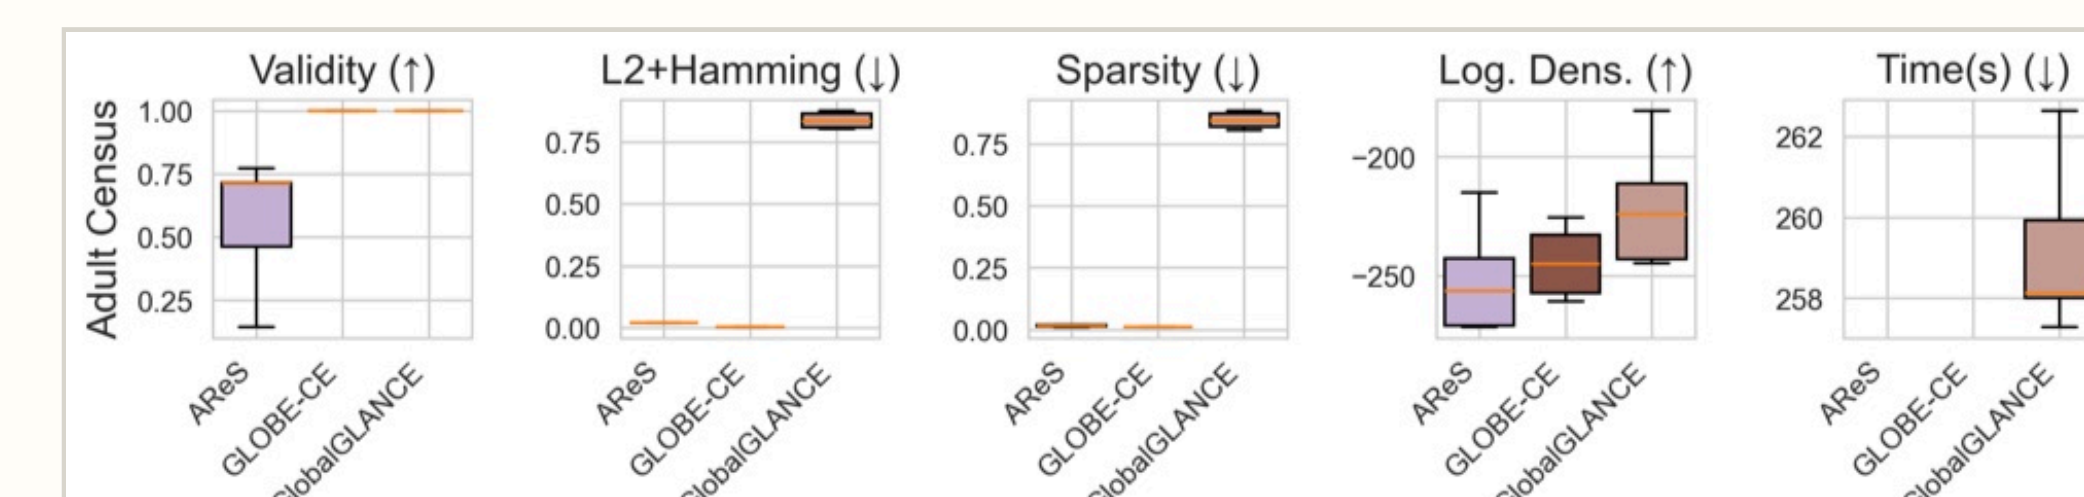

Extensible open-source benchmark workbench

Code & project

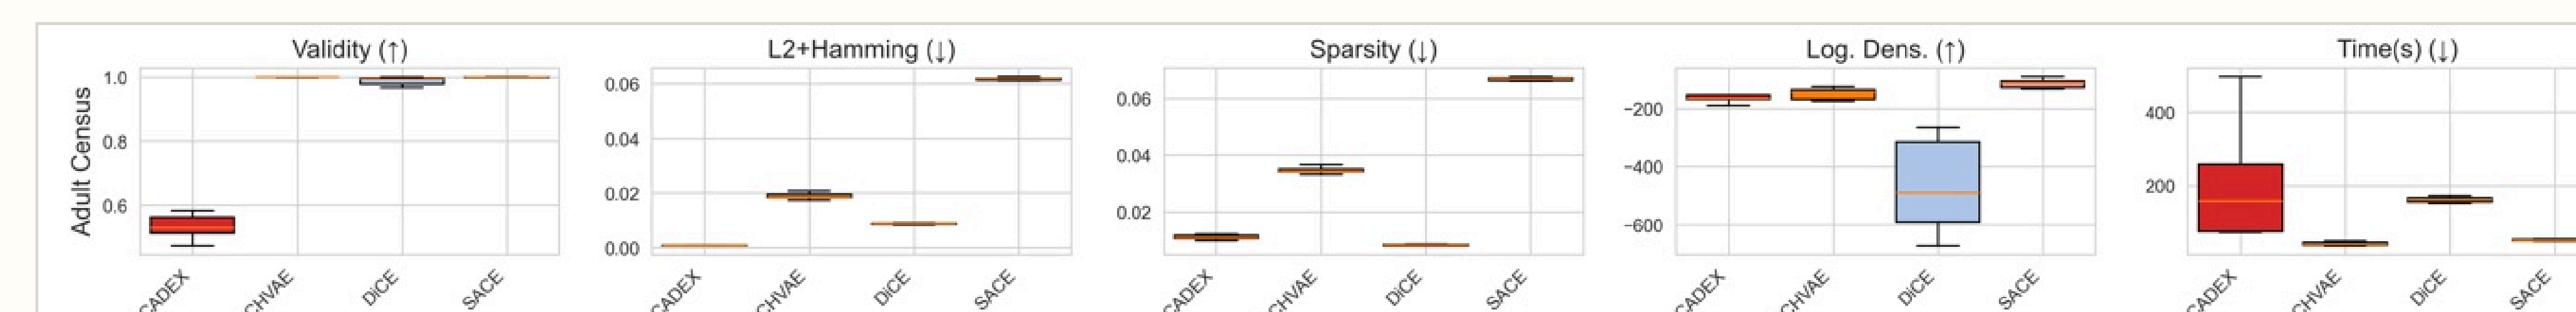

Global: validity and failures

GLOBE-CE and GlobalGLANCE: stronger validity. AReS: frequent missing outputs.

Local: no single winner

Validity, proximity, plausibility, and runtime trade off.

Group-wise: reach versus change

GLANCE reaches more; T-CREx makes smaller, more plausible shifts when applicable.
